

GUIDANCE

Digital tools and Method development

#Guidance is a trans-national project that focuses on digital awareness and understanding.

Together we are finding out the best ways to carry out career guidance by digital tools, now and in the future.

We are an Erasmus project, running 2021–2023.

WHY?

The pandemic made the whole world go digital. But how do digital tools work with career guidance?

We want to

- find ways to **equalize children's way of guidance** by creating an inclusive digital environment throughout the education system
- **learn and share best practice on how to efficiently use and adapt digital tools and methods** among targeted school staff and other career counsellors in our organizations.

OUR VISION

Social inclusion and equality in career guidance throughout the education system.

HOW AND WHO?

By **listening to people who practice career guidance** in five different countries we will build the best practices.

A first survey is done that includes 63 people from

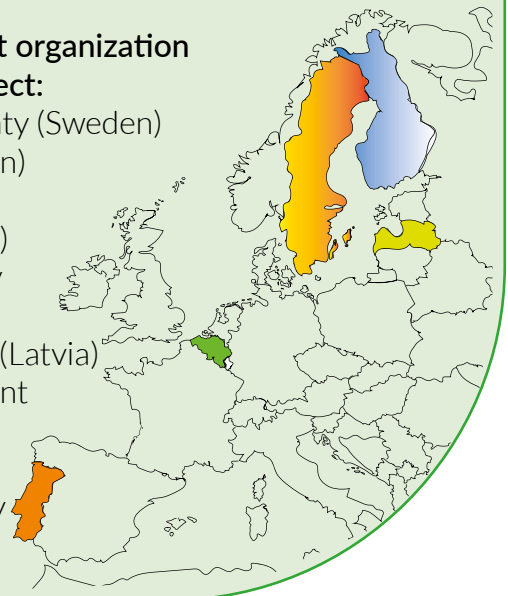

the five countries that work with career guidance.

The survey shows that **there are many differences** in both education, where to find information and how to use digital tools.

WHERE?

Five countries and eight organization partners are in the project:

- Region Örebro County (Sweden)
- Competence (Sweden)
- The Municipality of Norrköping (Sweden)
- Satakunta University (Finland)
- Kekeva Municipality (Latvia)
- Valmiera Development Agency (Latvia)
- Stebo (Belgium)
- Lousada Municipality (Portugal)

OUR GOALS

Main goal

Enhanced conditions for partner countries and organizations to **implement efficient and inclusive digital career guidance** for youth and young adults.

Sub-goal 1:
Background survey

Sub-goal 2:
Development of a digital system

Sub-goal 3:
Increased knowledge among career counsellors

Sub-goal 4:
Dissemination of results
